EXECUTIVE SUMMARY

My research examines the spatiotemporal dynamics of population ecology, with a focus on systems and processes that are discrete, stochastic, and non-linear. As a quantitative ecologist, I draw inspiration and methodology from a range of disciplines, including chemistry, physics, and mathematics. I use empirical data, numerical simulations, and modern statistical methods to identify key determinants of population dynamics. I am particularly interested in stochastic extinction and persistence, population response to perturbation, and demographic founder events such as colonization and development of resistance. At present, my study systems include childhood diseases in the pre-vaccine era U.S. and mosquito population dynamics in Iquitos, Peru.

My research is facilitated by cutting-edge quantitative tools: the R and C++ programming languages for data visualization, numerical simulation, and statistical modeling, as well as SQL for advanced data management. I use reproducible research best practices to maximize work efficiency and quality.

I have extensive experience teaching and mentoring students from diverse backgrounds, and believe that student training is critical to developing the next generation of data-driven scientists. In particular, I aim to increase student access to probability and statistics, scientific programming, and reproducible research methods.

EDUCATION

University of New Mexico, Albuquerque *Summer 2014*
Ph.D. with Distinction in Biology (Disease Ecology with concentration in Integrative Biology)
Committee: Drs. Helen J. Wearing (advisor), Jim Brown, Melanie Moses, and Erik Erhardt
Title: Population and metapopulation ecology of childhood diseases in the pre-vaccine era United States

University of New Mexico, Albuquerque *Fall 2009*
Masters of Water Resources (Riparian Hydroecology)
Advisors: Drs. Bruce Thomson and Roy Jemison
Title: Estimating pHreatophyte evapotranspiration from diel groundwater fluctuations in the Middle Rio Grande Bosque

University of Georgia, Athens *Fall 2001*
Bachelor of Science, Biochemistry and Molecular Biology
Advisor: Dr. James Omichinski

RESEARCH EXPERIENCE

Post-doctoral Researcher Oct 2014 - Present
Departments of Entomology and Mathematics, NCSU Raleigh, NC
· Statistical analysis of *Aedes aegypti* field spraying trials in Iquitos, Peru
· Continue development of Skeeter Buster of *Aedes aegypti* population dynamics simulation model
· Mentor graduate students

Research Assistant Jan 2010 - Oct 2014
Wearing Lab, UNM Biology Albuquerque, NM
· Conduct original research for publication and assist with grant writing
· Systems administrator and data manager
· Undergraduate training and mentorship

Hydrology Research Technician Jan 2006 - Jan 2009
Rocky Mountain Research Station, U.S. Forest Service Albuquerque, NM
· Conduct original research and prepare technical reports for U.S. Forest Service
· Collect and managed environmental monitoring data

Plant Genetics Lab Technician Jun 2003 - Jun 2004
Malmberg Lab, UGA Plant Biology Athens, GA
· Isolated DNA, Conducted PCR
· Design data entry and management system

NMR Lab Technician Jan 2001 - Jun 2002
Omichinski Lab, UGA Biochemistry and Molecular Biology Athens, GA
· Administer mixed Unix workstation cluster
· Evaluate linux hardware/software for high-performance NMR data visualization

GRANTS

Jun 2011 ($2,000). UNM PiBBS Student Enrichment Opportunities Grant to

May 2010 ($500). EEID Conference Workshop travel grant.

Mar 2010 ($80,000). Center for Evolutionary & Theoretical Immunology (CETI) Seed Grant, Waning Immunity in Influenza and Whooping Cough, Contributing author.

Aug 2009 (≈$50,000). Program in Interdisciplinary Biological and Biomedical Sciences (PIBBS) 2 year fellowship.

May 2007 ($4,400). UNM Graduate Research and Development grant, Hydrological research in the Middle Rio Grande Bosque.

AWARDS

Apr 2013 ($500). UNM Biology Department Scholarship.

Apr 2013. Graduate oral presentation, 2^{nd} place. UNM Biology Research Day. attend SFI Complex Systems Summer School.

Apr 2010 ($500). UNM SRAC travel grant to attend useR2010.

Apr 2010. Graduate poster presentation, 1^{st} place. UNM Biology Research Day.

TEACHING

INSTRUCTOR

Probability for Scientists Fall 2013, UNM Biology

· Course designer, lead instructor
· Mixed undergraduate/graduate course (primarily undergraduate)
· Hands-on course covering introductory probability, statistics, and data analysis

TEACHING ASSISTANT

Biology for Non-majors Spring 2014

Statistical Programming Spring 2013, UNM Statistics

· Mixed undergraduate/graduate course (primarily graduate)
· Also guest lectured

Genetics Spring 2009, UNM Biology

Ecology & Evolution Fall 2008, UNM Biology

· Assisted in writing course material

GUEST LECTURER

Theoretical Ecology Spring 2015, University of Montana

· Also assisted students with R

WORKSHOPS AND TRAINING

Computational Skills for Scientists Training Workshop Aug 2016, Univ. of Montana

· Guest lecturer

Industrial Math/Stat Modeling Workshop for Graduate Students July 2015, NCSU

· Guest instructor, student mentor

Software Carpentry Workshop Jan 2015, NCSU

· Teaching assistant, guest lecturer

UNM R Programming Group Fall 2010 - Spring 2013, UNM

· Organized and led weekly R programming group
· Participants included undergraduate and graduate students and professors

Ecology Workshop May 2010, Univ. of Michigan

· Teaching assistant
· NSF-funded graduate training program, part of Ecology and Evolution of Infectious Disease conference

MENTORING

Spring 2015 - present. Robert Liberatore, Math Education Software Developer

Fall 2015 - present. Michael Vella, NCSU Mathematics Ph.D. Student

Fall 2015 - Fall 2016. Gabriel Zilnik, NCSU Entomology Masters Student

Spring 2011 - Spring 2012. Nathan Cournoyer, UNM Biology Undergraduate Student

CONFERENCES AND PROFESSIONAL EVENTS

Sep 2015. Society of Vector Ecology Conference. Albuquerque, NM.

Nov 2014. American Society of Tropical Medicine and Hygiene Annual Conference. New Orleans, LA.

Jun 2014. Ecology and Evolution of Infectious Disease Conference. Colorado State University. Fort Collins, CO.

May 2013. Ecology and Evolution of Infectious Disease Conference. Pennsylvania State University. State College, PA.

May 2012. Ecology and Evolution of Infectious Disease Conference and Workshop. University of Michigan. Ann Arbor, MI.

Oct 2011. Rcpp R Programming Master Class. San Francisco, CA.

Aug 2011. Ecological Society of America Conference. Austin, TX.

Jun 2011. Santa Fe Institute Complex Systems Summer School. Santa Fe Institute. Santa Fe, NM.

Jul 2010. useR 2010 Conference. Gaithersburg, MD.

May 2010. Ecology and Evolution of Infectious Disease Conference and Workshop. Cornell University. Ithica, NY.

Aug 2009. Ecological Society of America Conference. Albuquerque, NM.

May 2007. National Groundwater Association Conference. Albuquerque, NM.

PROFESSIONAL SERVICE

2015. Reviewer, Ecology Letters.

2014. Reviewer, Theoretical Ecology.

Mar 2009. Grant reader, Graduate Research Allocations Committee (GRAC). UNM Biology.

SOFTWARE DEVELOPMENT

Fall 2014 - Present. Develop and maintain Skeeter Buster: a stochastic, spatially-explicit, agent-based C++ simulation model of *Aedes aegypti* population dynamics.

Spring 2013. Wrote code, documentation, and tests according to specifications of Drs. J. M. Rowland and C. Qualls for `discrimArts`: R package for probability distribution estimation.

Oct 2010 - Mar 2012. Contributor to `Rcpp`: R package for C++ development.

2009-2012. Maintainer of `Rwave`: R package for continuous wavelet transforms.

2010-2011. Contributor to `xts` and `zoo`: R packages for time series handling and analysis.
